

# Concept **Cordless Picture Light | LED Remote Control**

18 inch

## Slim and Compact

A longer, sleeker version of the original 11 ½ in. Model, extends to 18 in. Using new LED light technology, this cordless, remote controlled picture light provides superior lighting to illuminate paintings, photos and other artwork.

It features warm white LEDs that provide bright, even light. Safe for artwork, the LEDs produce no heat or harmful UV rays. Included is a remote control that allows you to control and dim the light.

The light can conveniently be controlled either from the base unit or the included remote, and lasts for **OVER 80 hours** on a set of batteries.

Combining smart and efficient technology, this light offers it all: superior brightness, excellent color rendition, unprecedented battery life **AND** remote control.

# CONCEPT CORDLESS PICTURE LIGHT | LED Remote Control

*This Cordless Picture Light way outshines any others: bright, dimmable, over 80 hours of battery life AND Remote Control!*

## PATENTED DESIGN:

Advanced solid state circuit uses PWM (Pulse Width Modulation)

Bright, efficient SMD LED technology for superior color rendition

Over 80 hours of life (on brightest setting!)

Remote Control with dimming included (Light can be controlled by remote or on main unit)  
Use one controller for multiple lights

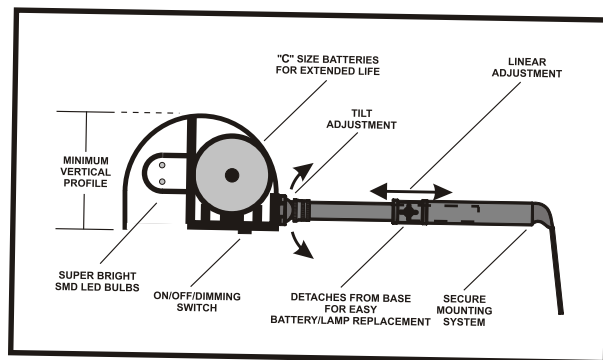

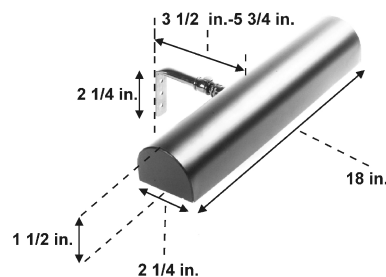

Uses 8 C batteries (lamp) and 2 AAA batteries (remote) (not included)

Solid metal construction

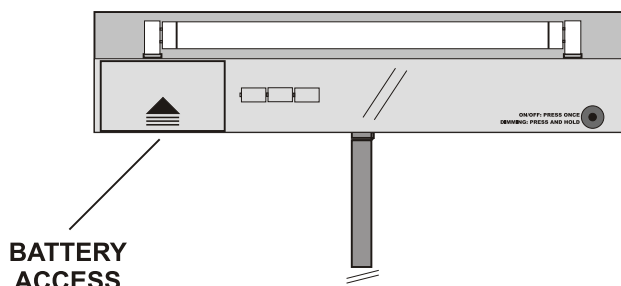

Minimum Vertical Profile-looks like a conventional picture light

Works great with rechargeable batteries also

18 in Cordless Picture Light Dimensions

## Specifications / Notes

Finishes: Polished Brass (Model 301L); Antique Brass (Model 302L)  
Black (Model 303L); Satin-Nickel (Model 305L)

Size: (Shade) 18 in wide; 1 3/4 in high  
Extends from 5 3/4 in. To 7 3/4 in.

Batteries: 80 hour rating measured by cycling at 12 hours of operation with a 2 hour rest period in between (on brightest setting), using alkaline batteries. Better performance--up to 120 hours total operation--under realistic conditions of 4-5 hours (one evening's use) at a time

LEDs: The maintenance free LED's last virtually forever due to their 50,000 hour rating. They provide an unparalleled warm white color temperature and superior dispersion of light as compared to traditional LED's for a warm, even glow over artwork
