## ENERGY INFORMATION of High Speed

<b>Airflow</b>	<b>Electricity Rate</b>	<b>Airflow Efficiency</b>
<b>4700</b>	<b>46</b>	<b>102.17</b>
<b>Cubic Feet Per Minute</b>	<b>Watts (excluded lights)</b>	<b>Cubic Feet Per Minute Per Watt</b>

Compare: 36" to 48" ceiling fans have airflow efficiencies ranging from approximately 71 to 86 cubic feet per minute per watt at high speed.

**Money Saving Tip:** Turn off fan when leaving room.
